The 1,800mm-high panels can either be installed unadorned, highlighting the contemporary rust finish of the 2.0mm-thick corten steel, or they can be used as decorative outdoor features by incorporating laser-cut patterns.

In terms of visual design, customers can choose from laser-cut floral patterns or motifs based on the Ritmo, Staccato or Legato grating covers produced by the metal products manufacturer. On request, individual patterns or logos can also be integrated into the panels.
