RichardBrink_Ventus-Gastro_04 From a dining perspective, the Modular Ventus creates structure, especially where several boxes are used together, and clearly separates seating areas from public spaces.

RichardBrink_Ventus-Gastro_05 By opting for a satin-glass panel, the product also functions as a privacy screen. This can be enhanced with appropriate greenery, for which there is ample space in the plant box itself.

RichardBrink_Ventus-Gastro_06 Rather than having the box planted, the Modular Ventus can alternatively be fitted with a high-quality seat made of wood.

RichardBrink_Ventus-Gastro_07 The individual modules can easily be expanded to form a row or corner element. This allows entire seating and relaxation areas to be individually assembled.
