Planter Wall Eva

Manufacturer

Richard Brink GmbH & Co KG
Metal goods manufacture and distribution
Görlitzer Str. 1
33758 Schloß Holte-Stukenbrock
Phone: 0049 (0)5207 9504-0
Fax: 0049 (0)5207 9504-20

Status: 02/22

Product description

The product Eva is a planting wall that allows the creation of additional vegetation in a minimal space thanks to its greened side walls. In addition to the greenery and the resulting improved indoor climate, the planting wall also functions as noise and privacy protection.

Dimensions

The planting wall is supplied in two different heights.

Height	Width	Depth bottom	Depth top
1,176 mm	1,450 mm	500 mm	324 mm
1,944 mm	1,450 mm	500 mm	209 mm

As standard, the planter wall is available in the versions natural (*without surface treatment*), with powder coatings in the colours pure white (*RAL 9010*) or micaceous iron ore (*DB 703*). Other colours are available on request.

At the customer's request, all dimensions can be modified and supplied as custom-made products.

There is room for 20 plants per panel; in the lower version there are 120 plants, in the higher version there are 200 plants per wall.

Materials used

We use only European material from Germany, Sweden, France and Italy for our products.

Material specification planting wall

Hot-dip galvanised steel with magnesium-zinc coating.

Material thickness: 2.0 mm

Processing and care instructions

There are different construction options. Either the planting wall can be filled with a mineral bulk material mixture with small proportions of organic substance (spec. dry weight should be at least 1,036 kg/m³) or with soil or substrate of choice.

Our installation instructions apply.

Cleaning the planting wall must not be done with strong acids or bases, but by hand with a broom or, if necessary, with a high-pressure cleaner.

Further installation & usage instructions as well as information on the material can be found under:
