Phone: 0049 (0)5207 9504-0
Fax: 0049 (0)5207 9504-20

Product description

The wall connection profiles are edge profiles in the area of the wall connection made of aluminium and, on request, also made of stainless steel. You can order standard or special dimensions via our order fax. Coatings in RAL colours are possible.

Dimensions

The wall connection profiles are offered in these dimensions as standard

Standard length: 3000 mm

Outside corners and inside corners have the following dimensions:

Other dimensions are also possible in special construction.

Material specifications

Material: aluminium (*AlMg3*), on request stainless steel V2A (*1.4301*)

Material thicknesses: 1.5 mm each

Accessories

Connector

End pieces (left and right)

Soffit plates

Processing and care instructions

Care should always be taken when storing and processing wall connection profiles.

Dust particles of other metals or general cutting of components with flying sparks onto the product should generally be avoided, as the surfaces of all materials are very sensitive. If dust particles or soiling of other metals are present, these must be removed immediately with appropriate cleaning agents.

In order to permanently maintain the outer appearance of the wall connection profiles, regular cleaning work is generally recommended. For this purpose, the profiles should be cleaned by hand with suitable, non-abrasive cleaning agents.

A coating can be damaged by direct contact with spray and/or salt water.

Further installation & usage instructions as well as information on the material can be found under:
