Captus dirt trays with boot scrapers – for a clean entrance area

Our **Captus** dirt trays, made from either stainless steel, hot-dip galvanised steel or fibre-modified concrete, provide custom systems for every entrance area that form a functional unit when combined with our boot scrapers. The system is based around the tray, which we manufacture to your project-specific dimensions, similarly from stainless steel or hot-dip galvanised steel. We also offer standard variants made from concrete. The trays generally incorporate a drain nozzle to direct away any precipitation or accumulating water. They can, however, also be supplied without a nozzle.

The boot scraper is manufactured in stainless steel or hot-dip galvanised steel based on the dimensions of the dirt tray and installed in the outwardly projecting support base. A wide range of designs is available to suit every preference. Rather than being fitted with a grating, the dirt tray can optionally be furnished with entrance mats.

Dirt trays

Material
stainless steel (V2A, V4A)
or hot-dip galvanised steel

Nozzle
DN 50, 70, 100 or 150
centred, freely positioned or without

Material thickness
1,5 mm

Boot scrapers

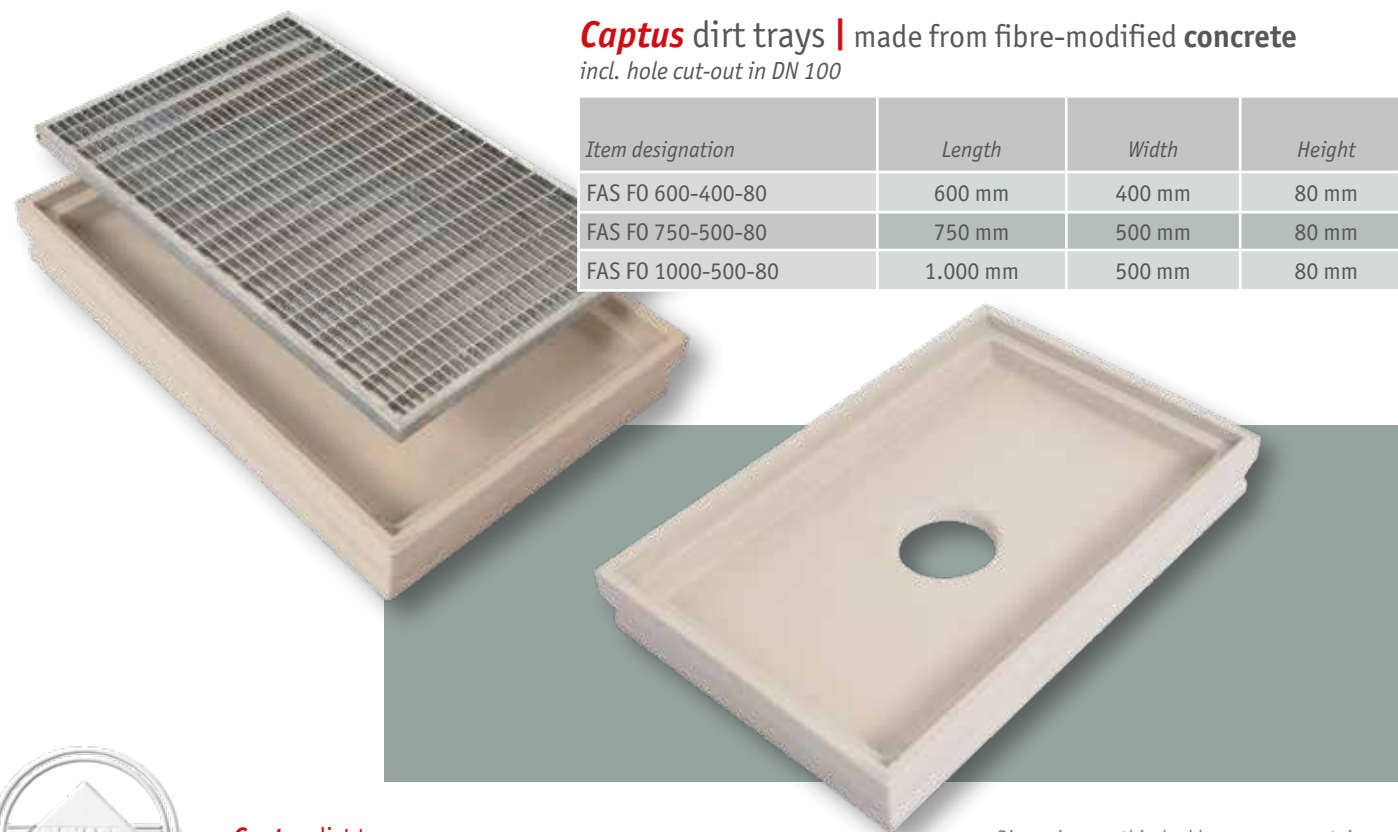

Material
stainless steel (V2A) or
hot-dip galvanised steel

Load class
foot traffic

**Always
made to
measure**

Captus dirt trays | made from fibre-modified concrete incl. hole cut-out in DN 100

Item designation	Length	Width	Height
FAS FO 600-400-80	600 mm	400 mm	80 mm
FAS FO 750-500-80	750 mm	500 mm	80 mm
FAS FO 1000-500-80	1.000 mm	500 mm	80 mm

Boot scrapers for Captus dirt trays

When using the online configurator for our **Captus** dirt trays, you can choose between five different gratings in four distinct designs. Besides our metal covers, we can also provide the dirt trays with entrance mats, optionally fitted with brush-and-rubber inserts or with doormats.

Mesh grating 30x10
stainless steel

Mesh grating 30x10
hot-dip galvanised steel

Longitudinal bar grating 20x30
stainless steel or
hot-dip galvanised steel

Hydra Linearis
stainless steel

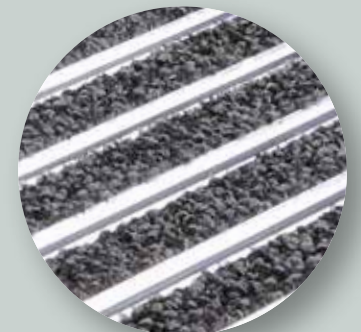

Longitudinal bar grating 7x7
stainless steel

Entrance mat with brush-and-rubber insert

Entrance mat (doormat)

Online configurator for custom-made products

Configure online in just a few steps

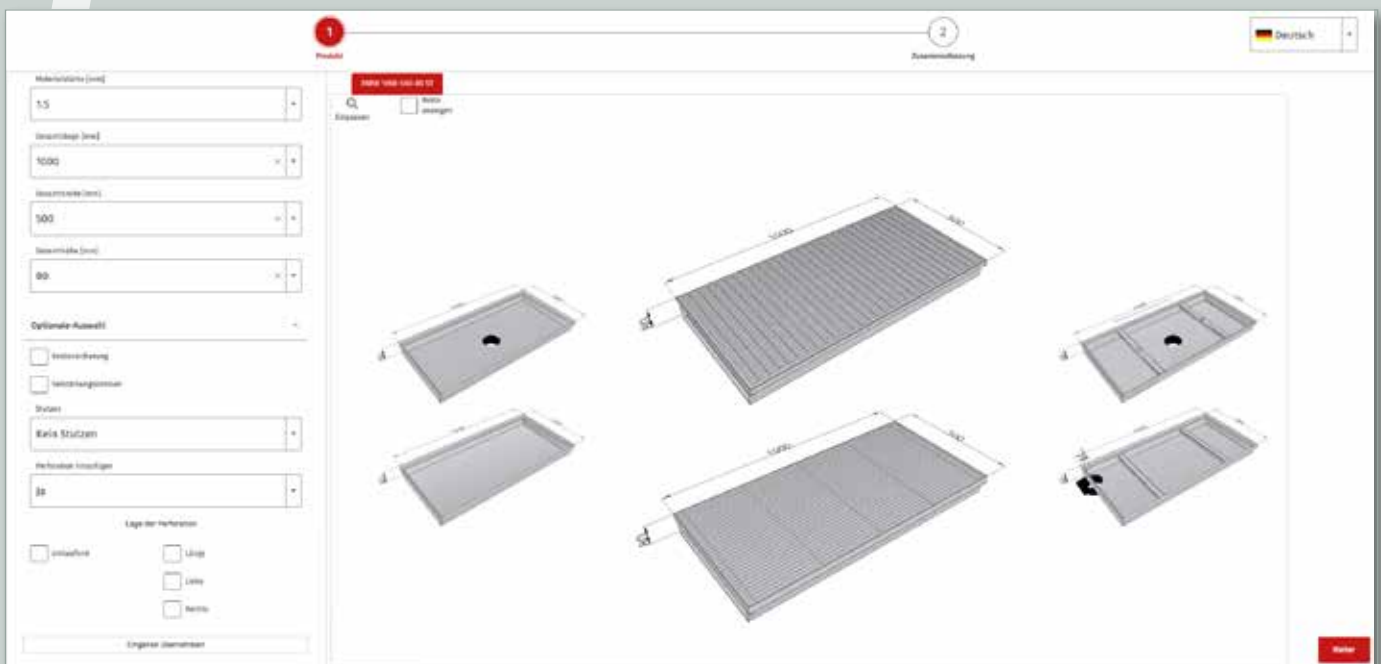

We now provide an online configurator for our range of boot scrapers, which allows you to complete and define all of the options for your desired grating and dirt tray.

Best of all: we are always happy to provide bespoke solutions – simply enter your project-specific measurements.

In the final stage, you will receive both a live preview and a ready-to-order product summary.

Our aspiration: to simply be better.

More than *45 years* of metalware production

Richard Brink is a medium-sized and growing family-run company from Schloss Holte-Stukenbrock. Founded in 1976, the company is now managed by the second generation. With over 150 employees and our own, also internationally oriented sales team based, for instance, in Austria, France and the Netherlands, we have established ourselves in the market as a specialist for premium metal goods.

We develop, produce and sell innovative drainage and dewatering solutions alongside versatile planting systems and products for roofs and walls, industry, bathrooms and kitchens.

In doing so, we place great importance on a level of workmanship and dimensional accuracy that satisfies our customers' own high standards. Not only are we known for our broad range of standard products, we have also made a name for ourselves as a manufacturer of individual, custom-made products and bespoke solutions.
